Brick Garden Guidelines

Purpose: The Normandale Community College Foundation Brick Garden Campaign commenced in Spring 2018 to support the College Mission of advancing student’s intellectual, career and personal development. The Brick Garden will be located on the Normandale Community College Campus and seeks to create awareness about the generous community that supports the foundation and college. Suggested brick content includes the following: donor name, organization name, memorial name, and/or milestone (for example – Normandale’s 50th Anniversary).

The Normandale Community College Foundation established the brick garden campaign with guidelines and expectations that comply with State of Minnesota policies. By submitting a brick order you agree to the following:

1. All items submitted for brick garden engraving must comply with State of Minnesota or Normandale Community College rules, regulations, policies or laws. Items that do not comply will be returned for revision and an alternative image or verbiage will be requested for review.
2. In the unlikely event that an approved engraving is later deemed out of compliance or adherence with State of Minnesota or Normandale Community College rules, regulations, policies or laws, the item will be removed from the garden and the donor will be notified.
3. Donors are responsible for ensuring they have the rights to the verbiage or image they designate for engraving on their item, and they understand that the verbiage or image in the engraving may be used in marketing and other materials produced by Normandale Community College and the Foundation.
4. Engraved items will not be replaced as they wear out. Bricks and benches will be exposed to the elements and will break down over time.
5. The college reserves the right to relocate the garden, bricks or benches and/or to remove items due to disrepair or erosion as evidenced by their appearance.
