The Office for Students with Disabilities (OSD) is Normandale’s program to provide accommodations for students with disabilities. The goal of the program is to offer students with documented disabilities equal access to Normandale Community College courses, programs, and events through appropriate and reasonable accommodations.

This document is available in alternative formats for individuals with disabilities by calling 952-358-8625.
The Law:

• What is the ADA?

The Americans with Disabilities Act (1990, 2008) includes basic civil rights guaranteed for people in the United States who have disabilities. With regard to colleges and college students, the ADA upholds and extends the standards set forth in Section 504 of the Rehabilitation Act of 1973 which states that:

“No otherwise qualified person with a disability in the United States shall, solely by reason of... disability, be denied the benefits of, be excluded from participation in, or be subjected to discrimination under any program or activity receiving federal financial assistance.”

• A person with a disability includes:

“Any person who (1) has a physical or mental impairment which substantially limits one or more major life activities, (2) has a record of such an impairment, or (3) is regarded as having such an impairment.”

• For college accommodation purposes a person with disability includes:

Any person who has a physical or mental impairment that substantially limits one or more major life activities. Major life activities may include: seeing, hearing, speaking, walking, breathing, sleeping, caring for oneself, performing manual tasks, learning, working, standing, lifting, concentrating, and interacting with others.

According to the law, college faculty is obligated to assist students with disabilities. The term “otherwise qualified individual” means that the student does meet the admission requirements for the college.

Eligible students are those who meet admission requirements, have documentation of a disability, and have met with the Office for Students with Disabilities in advance of a request for accommodations. However, certain programs have additional technical standards that exceed the standards for college admittance. If this is the case, students who are registered with the OSD must meet these standards, but the standards must be applied so that they do not discriminate against a student with a disability or any student.
Latin in the early 19th century was a more advanced stage of Latin, as the language continued to evolve. In the 19th century, the focus shifted from traditional grammar to a more modern approach, which included the study of Latin literature and its influence on the modern world. This shift was driven by the Enlightenment, which emphasized the importance of reason and empirical observation. The study of Latin was seen as a way to gain knowledge and understanding of the past, and to contribute to the present. The 19th century also saw the rise of a new generation of Latin scholars, who were dedicated to the study of the language and its history. These scholars were often associated with universities, and they worked to preserve and promote the study of Latin. The 19th century also saw the emergence of a new form of Latin, which was characterized by its use in scientific and technical writing. This form of Latin was known as Latin scientific, and it was used in a wide variety of fields, including medicine, law, and engineering. This form of Latin was characterized by its use of technical vocabulary, and its focus on clarity and precision. The 19th century also saw the emergence of a new form of Latin, which was known as Latin philological. This form of Latin was characterized by its focus on the study of language and literature. This form of Latin was used in the study of ancient literature, and it was characterized by its focus on grammar and syntax. The 19th century also saw the emergence of a new form of Latin, which was known as Latin literary. This form of Latin was characterized by its focus on literature, and it was used in the study of ancient literature. This form of Latin was characterized by its focus on literature, and it was used in the study of ancient literature. The 19th century also saw the emergence of a new form of Latin, which was known as Latin educational. This form of Latin was characterized by its use in education, and it was used in the teaching of ancient literature. This form of Latin was characterized by its use in education, and it was used in the teaching of ancient literature. The 19th century also saw the emergence of a new form of Latin, which was known as Latin religious. This form of Latin was characterized by its use in religious writing, and it was used in the study of ancient literature. This form of Latin was characterized by its use in religious writing, and it was used in the study of ancient literature. The 19th century also saw the emergence of a new form of Latin, which was known as Latin historical. This form of Latin was characterized by its use in the study of ancient literature, and it was used in the teaching of ancient literature. This form of Latin was characterized by its use in the study of ancient literature, and it was used in the teaching of ancient literature. This form of Latin was characterized by its use in the study of ancient literature, and it was used in the teaching of ancient literature.
Procedures for implementing accommodations:

Alternative testing
Alternative testing may include extended time, testing in a quiet room, taped tests, enlarged print, use of a computer, or use of a scribe. Each semester an eligible student will bring the instructor the confidential “Testing Accommodation Letter” (see page 20 for an example of this letter) to request alternative testing. This letter will state what particular accommodation(s) the student receives. Also, 3-4 days before each test the student should bring the instructor a purple alternative testing form (see page 21 for an example of this form). The instructor should complete this form and return it with the test to the OSD office in L2751 or the locked after hours drop off box in the Make-up Testing room in L2740.

The OSD staff will record, enlarge, or complete whatever is necessary for the student. Two days’ notice is required if the test needs to be taped or enlarged. The OSD or testing center staff will proctor the test in the allotted time for the student. The student should, whenever possible, take the test at the same time as the class (sometimes not possible because of evening or weekend classes). Completed tests are delivered to instructors’ mailboxes that evening. To make special arrangements concerning the delivery of a test, please call the OSD at 8625 or write it on the purple form.

Note taking
Students with disabilities that impact their writing ability are eligible for note taking. At Normandale, note taking is provided in several ways. For many classes, OSD staff will recruit volunteer note takers to make copies of their notes for the eligible students. The OSD may ask instructors for suggestions in recruiting for a class. For evening and weekend classes, the OSD may ask the instructor to recruit the volunteers. It may also be helpful if the instructor can provide a copy of their notes if they are not already posted on Desire2Learn (D2L).

The volunteers will either come to the OSD office and copy their notes using our copier, or they may use carbonless NCR paper to produce the copies in class. Both options are at no cost to the volunteers. Students may fulfill service learning requirements by volunteering to be a note taker.

Occasionally, a student worker or OSD staff member will serve as a note taker and scribe in a class. This is usually for classes that require frequent in-class writing.

Adjustable tables or chairs
Special tables and chairs are available through the OSD office; most rooms are equipped with adjustable tables. If a student requests a table or chair, have her/him contact the OSD.

Sign language
All interpreting services for students are arranged through the OSD. If a student in your class uses an interpreter and you are not familiar with this accommodation, contact the OSD with any questions you have. Reserved seats (usually in the front of the room) will be set up for the student and the interpreter. Please remember to address the student, not the interpreter. See page 25 for further information.
Disability-Related Absences

OSD students who have chronic illnesses or mental health difficulties may unexpectedly be absent from class because of unforeseen disability-related reasons such as hospitalizations, outpatient treatment, or a flare-up from a chronic illness. Because of student need and in response to recent case law, the OSD has implemented an accommodation that may be included on a student accommodation plan, which states, “Students experiencing disability-related absences should contact the OSD staff ASAP so conversations can be facilitated with faculty.”

The Disability-Related Absence Request Process

- Students who receive any accommodation at Normandale Community College must be a part of the OSD program by meeting with an OSD staff member for an intake interview and providing appropriate disability documentation. During the intake process, the OSD staff will determine if a student is eligible to receive disability-related absences as an accommodation. If it is determined to be a reasonable accommodation, it will be a part of a student’s accommodation plan. Some students may meet for an intake interview after experiencing a disability-related absence. OSD accommodations are not retroactive, but faculty in these instances can consider the situation and assist students as appropriate.

- During the intake/interview process, the OSD staff member gives a thorough description and explanation of the disability-related absence accommodation to each student who meet the requirements of the accommodation. This includes clarifying with students their responsibility and what may qualify as a disability-related absence.

- The disability-related absence accommodation will be included on the accommodation eligibility form and given to instructor(s) shortly after the intake process is completed.

- When a disability-related absence is experienced, students need to contact the OSD staff to start the process. The OSD staff will provide students the Disability-Related Absence Form and instruct the student to fill out the form in its entirety before submitting it back to the OSD staff. In most situations, the OSD staff will not act on the accommodation until the student has completed and returned the form.

- When the student returns the Disability-Related Absence Form, the OSD staff will determine if the absence was due to an unforeseen disability related situation, usually by having a follow-up conversation with the student, and if necessary, by requesting medical documentation.

- If the request seems to meet the requirements for a disability-related absence, the OSD staff will contact each instructor for further discussion about the student situation. If the absences are within a reasonable time range and the instructor verifies the student description, a plan for the student to make up tests or assignments is established.

- Once the instructor and the OSD staff have agreed upon an appropriate plan of action, the OSD staff will contact the student to inform them of the determined plan in response to the disability-related absence request. The OSD staff will encourage students to follow up with their instructor(s) if they have any questions regarding implementation of the plan.
The OSD staff will follow up with the student about one week after the plan was agreed upon to ensure that the implementation of the plan went smoothly and to see if the student has any final questions or concerns. If needed, the OSD staff may also follow up with the instructor for further clarification.

Other accommodations
Other accommodations are dealt with on a case-by-case basis in consultation with the student, instructor, and the OSD staff.

Confidentiality:
Please maintain the confidentiality of the students in the OSD program in your classes.

RIGHTS AND RESPONSIBILITIES

Rights of Students
- The right to equal access to postsecondary education
- The right to not be discriminated against
- The right to participate in and enjoy the benefits of school
- The right to an accessible education
- The right to an appropriate accommodation
- The right to have information about a disability kept private

Responsibilities of Students
- Self-identify disability status to OSD
- Provide recent documentation about disability
- Request necessary accommodations in a timely manner
- Follow all Normandale and OSD policies and procedures
- Meet and maintain the same academic qualifications and essential institutional standards as other students on campus
- Follow the college`s student code of conduct as all students on campus

Rights of Normandale Community College
- Identify and establish essential functions, abilities, skills, knowledge, and standards for courses, programs, services, jobs, activities, and facilities and to evaluate accordingly
- Request and receive, through the OSD, current documentation from a qualified professional that supports requests for accommodations and services
- Deny requests for accommodations if the documentation does not demonstrate that the request is disability related, or if the individual fails to provide appropriate documentation
- Select among equally effective accommodations, adjustments, and/or auxiliary aids and services
- Refuse to provide an auxiliary aid or incur an expense if it constitutes undue hardship to the college
Responsibilities of Normandale Community College

- Accommodate the known limitations of an otherwise qualified student with a disability
- Provide information to students, faculty, staff, and guests with disabilities in accessible formats upon request
- Evaluate students on their abilities, not their disabilities
- Provide or arrange accommodations, academic adjustments, and/or auxiliary aids for students, faculty, staff, and guests with disabilities
- Maintain appropriate confidentiality of records and communication
- Maintain academic standards by providing accommodations without compromising the content, quality, or level of instruction

If an instructor IS notified by the Office for Students with Disabilities

Faculty members have the responsibility to cooperate with the OSD in providing authorized accommodations in a reasonable and timely manner. Questions or problems regarding implementation of an accommodation should be discussed with Debbie Tillman or Kayla Allen.

If an instructor IS NOT notified

If a student requests an accommodation and the faculty member has not been notified of the student’s eligibility for accommodations, then the faculty member should refer the student to the OSD.

TEACHING STUDENTS WITH DISABILITIES

Invisible Disabilities

Invisible disabilities are the most common type of disability among college students. For example, students with learning disabilities, Attention Deficit Hyperactivity Disorder and/or psychiatric disabilities may request accommodations even though they do not appear to have a disability. There are numerous other hidden or invisible disabilities such as a heart condition, Chronic Fatigue Syndrome, Fibromyalgia, and Seizure Disorder. It is important to remember that the severity of functional limitations do not depend on the ability to see the disability.

Types of Invisible Disabilities

Learning Disabilities

Students with learning disabilities often learn differently than their peers. Although they have average or above average intelligence, there is frequently a discrepancy between their ability and their achievement in specific areas due to a central nervous system dysfunction. A learning disability is a permanent disorder that interferes with integrating, acquiring, and/or demonstrating verbal or nonverbal abilities and skills. Frequently, there are some processing or memory deficits.

Each student with a learning disability may need different types of accommodations based on what area(s) of learning is affected by the disability. Students with learning disabilities will have difficulties with some of the following: reading comprehension, written expression, mathematics, oral expression, auditory processing, visual processing, abstract reasoning, processing speed, visual spatial skills. Keep in mind that no one individual has difficulty with all of the above areas, generally just a few. Also, it is not unusual for a person with a learning disability to be gifted in some areas.
A learning disability is not a disease, so there is no cure, but there are ways to overcome the challenges it poses through identification and accommodation.

Some examples of a specific learning disability include:
- Dyslexia – difficulty with reading, writing and spelling
- Dyscalculia – difficulty with math functions and using numbers
- Dysgraphia – difficulty with psychomotor skills needed for writing
- Auditory Processing Disorder – difficulty interpreting auditory information
- Expressive Language Disorder – difficulty expressing self in language

Possible Accommodations for students with Learning Disabilities:

Accommodations are made on an individual basis depending on the student’s diagnosis. Based on the nature of the learning areas affected, typical accommodations may include:
- Extended time for testing
- Testing in a separate room
- Audio recorded tests
- Note taker
- Alternative format textbooks
- Audio recording lectures

Attention Deficit Hyperactivity Disorder (ADHD)
Attention deficit hyperactivity disorder is characterized by a persistent pattern of inattention and/or hyperactivity that is more frequent and severe than is typically observed in individuals at a comparable level of development. Students with ADHD will have difficulty with one or more of the following areas: concentration, distractibility, organization, completing tasks, following directions, listening, sitting for lengthy periods.

Possible Accommodations for students with ADHD:
- Testing in a quiet area with few distractions
- Extended time for testing
- Note taker
- Preferential classroom seating
- Time management assistance
- Audio recording lectures

Mental Health Disabilities
Students with mental health disabilities exhibit “… a persistent psychological disorder or psychiatric disorder, emotional or mental illness that adversely affects educational performance and/or functioning and frequently requires medication” (http://disserv3.stu.umn.edu/AG-S/3-5.html, 1999). Descriptions of certain types of psychiatric disorders follow:

Depression is a major disorder that can begin at any age. Major depression may be characterized by a depressed mood most of each day, a lack of pleasure in most activities, thoughts of suicide, insomnia, and feelings of worthlessness or guilt.

Symptoms of Depression include:
- A persistent sad, anxious, or “empty” mood
- Sleeping too little or sleeping too much
- Reduced appetite and weight loss, or increased appetite and weight gain
- Loss of interest or pleasure in activities once enjoyed
- Restlessness or irritability
- Persistent physical symptoms that don’t respond to treatment (such as headaches, chronic pain, or constipation and other digestive disorders)
- Difficulty concentrating, remembering, or making decisions
- Fatigue or loss of energy
- Feeling guilty, hopeless or worthless
- Thoughts of death or suicide

Untreated depression is the number one cause of suicide. Any talk of suicide by a student needs to be taken seriously and help sought immediately. Express your concern to the student and make a referral to the Behavioral Intervention Team, college counseling office (952-358-8261), Public Safety (555 or 952-358-8280) or call emergency 911.

Emergency suicide interventions are available through COPE at 612-596-1223 or 911.

Bipolar disorder (manic depressive disorder) causes a person to experience periods of mania and depression. In the manic phase, a person might experience inflated self-esteem and a decreased need to sleep; however, in the depressive phase, a person may experience a lack of energy and less self-esteem and interest in family, friends, and school.

Dysthymia is a form of depression that is less severe than major depression; however, it involves long-term, chronic symptoms that do not disable but keep one from functioning well or from feeling good.

Seasonal Affective Disorder (SAD) is associated with depressive episodes that occur during the winter months (especially in the northern climates), with symptoms subsiding during the spring and summer months. These depressive episodes are related to seasonal variations of light. The most difficult months for people with SAD are January and February.

Anxiety disorders can disrupt a person’s ability to concentrate and cause hyperventilation, a racing heart, chest pains, dizziness, panic, and extreme fear. Examples of anxiety disorders include panic disorder, simple phobias, and Obsessive-Compulsive Disorder (OCD).

General Anxiety Disorder (GAD) is characterized by excessive, unrealistic worry that lasts six months or more. In adults, the anxiety may focus on issues such as health, money, relationships, or career. In addition to chronic worry, GAD symptoms may include trembling, muscular aches, insomnia, abdominal upsets, dizziness, and irritability.

Obsessive-Compulsive Disorder (OCD). Individuals with OCD are plagued by persistent, recurring thoughts (obsessions) that reflect exaggerated anxiety or fears. Typical obsessions include worry about being contaminated or fears of behaving improperly or acting violently. The obsessions may lead an individual to perform a ritual or routine (compulsion) such as repetitive counting or hand washing.

Panic Disorder. People with panic disorder suffer severe attacks of panic – which may make them feel like they are having a heart attack or are “going crazy” for no apparent reason. Symptoms include heart palpitations, chest pain or discomfort, sweating, trembling, tingling sensations, feeling of choking, fear of dying, fear of losing control, and/or feelings of unreality. Panic disorder often occurs with agoraphobia, in which people are afraid of having a panic attack in a place from which escape would be difficult, so they avoid these places.

Post-Traumatic Stress Disorder (PTSD). PTSD can follow an exposure to a traumatic event such as a sexual or physical assault, witnessing a death, the unexpected death of a loved one, or natural
disaster. There are three main symptoms associated with PTSD: 1. “reliving” the traumatic event (such as flashbacks and nightmares); 2. avoidance behaviors (such as avoiding places related to the trauma); and 3. physiological arousal such as difficulty sleeping, irritability or poor concentration.

Social Anxiety Disorder (Social Phobia). Social Anxiety Disorder is characterized by extreme anxiety about being judged by others or behaving in a way that might cause embarrassment or ridicule. This intense anxiety may lead to avoidance behavior. Physical symptoms associated with this disorder include heart palpitations, faintness, blushing and/or profuse sweating.

Specific phobias. People with specific phobias suffer from an intense fear reaction to a specific object or situation (such as spiders, dogs, or heights); the level of fear is usually inappropriate to the situation, and is recognized by the sufferer as being irrational. This inordinate fear can lead to the avoidance of common, everyday situations.

Schizophrenia affects how a person thinks, feels and acts. People with schizophrenia may have difficulty distinguishing between what is real and what is imaginary. Others with this disorder may have difficulty behaving “normally” in social situations or may be withdrawn or unresponsive. Schizophrenia, however, is not split personality or multiple personality. The vast majority of people with schizophrenia are not violent and do not pose a danger to others. The signs of schizophrenia are different for everyone. Symptoms may develop slowly over a period of months or years or may appear suddenly. The disease may also appear in cycles of relapse and remission. Behaviors or early warning signs of schizophrenia may include:
- Hearing or seeing something that isn’t there
- A constant feeling of being watched
- Unusual or nonsensical manner of speaking or writing
- Deterioration of academic or work performance
- Change in appearance or personal hygiene
- Increasing withdrawal from social situations
- Irrational, angry or fearful response to loved ones
- Inability to concentrate or sleep
- Excessive preoccupation with religion or occult

Symptoms of Schizophrenia may include:
- Delusions or false ideas
- Hallucinations – seeing, hearing, feeling, tasting or smelling something that doesn’t exist
- Disordered thinking and speech
- Social withdrawal
- Extreme apathy
- Lack of drive or initiative
- Emotional unresponsiveness

Autism Spectrum Disorders (ASD) is characterized by problems associated with development of social skills and behavior. Asperger’s is a mild form of Autism. Individuals with Asperger’s generally have normal intelligence and normal early language acquisition. However, individuals show difficulty with social interaction and nonverbal communication. Individuals with Asperger’s may also show obsessive or repetitive behavior.

Symptoms of ASD may include:
- Marked impairment in the use of multiple nonverbal behaviors (eye-to-eye gaze, facial expressions, and body postures)
- Failure to develop peer relationships appropriate to developmental level
• Lack of spontaneous seeking to share enjoyment, interests or achievements with other people
• Apparently inflexible adherence to specific, nonfunctional routines or rituals.
• Persistent preoccupation with parts of objects
• Stereotyped and repetitive motor mannerisms (hand or finger flapping or twisting, or complex whole body movements)
• Concrete thinking (versus abstract)
• Writing problems and difficulty with math
• Flat and emotionless voice
• Social awareness but inappropriate reciprocal interaction

Tourette’s Disorder. According to the American Psychiatric Association, DSM-IV-TR (2000), the essential features of Tourette’s Disorder are multiple motor tics and one or more vocal tics. A tic is a sudden rapid, recurrent, nonrhythmic, stereotyped motor movement or vocalization. Simple motor tics are: eye blinking, nose wrinkling, neck-jerking, shoulder shrugging, or facial grimacing. Simple vocal tics are meaningless words or sounds such as throat clearing, clicking, grunting, sniffing, snorting and/or coughing. Tics may occur many times a day recurrently throughout a period of more than a year. The symptoms may be lifelong, though periods of remission lasting from weeks to years may occur.

Eating Disorders. Individuals with eating disorders experience severe disturbances in their eating habits, including unhealthy reduction of food intake or unhealthy overeating. Eating disorders are real, treatable illnesses. Causes of eating disorders may include: low self-esteem, peer pressure to be thin, society or cultural pressures to be thin, or history of sexual abuse. Anorexia Nervosa and Bulimia Nervosa are the two most common types of eating disorders.

Anorexia Nervosa symptoms may include:
• Extreme weight loss
• The belief that one is fat despite excessive thinness
• Eats tiny portions of food, skips meals, and won’t eat in front of others
• Loses hair, appears pale in skin color, and wears baggy clothes to hide thinness
• Fears obesity and complains of being fat despite thinness
• Hates all or certain parts of body
• Excessive or compulsive exercise routine
• Perfectionist
• Becomes socially isolated
• Has difficulty expressing emotions, primarily anger

Bulimia Nervosa symptoms may include:
• Frequent acts of binge-eating and purging of food to prevent weight gain
• Buys binge food (primarily junk food or high-caloric foods)
• Uses water pills, diet pills or laxatives
• Abuses alcohol or drugs to suppress appetite or to escape emotional hurt
• Displays little impulse control – making poor decisions about sex, commitment, money, etc.

In most situations you will not be aware that you have a student with a mental health disability in your classroom. Because students do not show any outward sign of the disability does not mean that their disability is any less disabling than a more visible disability. Many of these students are fearful of and have faced stigmatization because of their disability. Some do not need or request any accommodations, and some require a variety of accommodations. With medication and/or therapy, people with mental health disabilities may learn to manage their symptoms.
Possible Accommodations for students with mental health disabilities

- Extended time for testing
- Testing in a separate area
- Allowing an anxious student to leave the room
- Note taking
- Audio taping lectures
- Alternative format textbooks

Learning Strategies for students with invisible disabilities

- Seek support from OSD to set up and provide accommodations as early as possible.
- Use a planner to stay organized. Record assignments and test dates in the planner.
- The following are some study tips:
  - Underline or highlight important ideas for review
  - Read the chapter summary or end of chapter questions before starting the chapter
  - Use word processing to help with organizing, editing, and spell checking
  - Use an electronic dictionary and thesaurus
  - Use a tape recorder to record lectures
  - Schedule time to study with a peer or tutor
  - Focus on one class at a time and break tasks into smaller parts
  - Study in an area that aids concentration
  - Establish a sense of purpose to studying
  - Remember that irregular sleep, exercise and eating patterns can cause concentration difficulties
  - Work in pairs, teams or small groups in order to learn from others
  - Use a think aloud technique, cue cards and verbal reminders when studying and doing assignments

Medical/Mobility Impairments

Mobility impairments are often due to conditions such as cerebral palsy, multiple sclerosis, muscular dystrophy, or spinal cord injury. Students may use crutches, braces, or a wheelchair. Medical impairments are often invisible disabilities, caused by such conditions as arthritis, asthma, cancer, orthopedic limitations, post-surgery, Chronic Fatigue Syndrome, or seizure disorder. The student may have limited energy; difficulty walking, standing, or sitting for a long time; or other disabling characteristics, such as an inability to write.

Functional limitations may be episodic for some students who may experience dizziness, disorientation, and difficulty breathing during a recurrence. For example, with asthma or a seizure disorder, a student may have periods when he can function without any accommodations, but at other times functional limitations are quite severe.

Even with the same disability, students with mobility or medical impairments may have a wide variety of characteristics. For example, persons with a spinal cord injury are likely to show differing degrees of limitation. They may require different types of accommodations or may need no accommodations, depending on functional limitations.

Traumatic Brain Injury is typically a consequence of an accident, but can also be caused from a stroke, lack of oxygen, poisoning, tumor or an infection. At least 1.5 million people sustain traumatic brain
injuries in this country every year. Students often display problems with attention deficit, memory and concentration.

The effects of the injury may be highly individual depending on the area of the brain affected. Students with TBI may experience frustration and anger often characterized by a quick temper. They typically exhibit discrepancies in abilities such as reading or spelling. Although there is great variation in the possible effects of a head injury, most injuries result in some degree of difficulties in the following functions:

- **Memory** – the primary difficulty is the inability to store information for immediate recall. However, long-term memory or previously acquired knowledge is usually intact.
- **Cognitive/Perceptual Communication** – students may have difficulty focusing for sufficient lengths of time for learning to take place. Attention and concentration may be influenced by medication, nutrition patterns, and fatigue resulting from disturbed sleep.
- **Speed of thinking** – it often takes the student longer to process information which influences reaction time, speed of response, and quickness of data integration.
- **Communication** – language function (writing, reading, speaking or listening) may be impaired. Problems in pragmatics may include interrupting, talking out of turn, dominating discussions, speaking too loudly or rudely, or standing too close to the listener. The student may have trouble comprehending written or spoken material especially under pressure such as during exams.
- **Spatial Reasoning** – refers to the ability to recognize shapes of objects, judge distances accurately, navigate, read a map, visualize images, comprehend mechanical functions, or recognize position in space.
- **Conceptualization** – TBI often reduces the ability to categorize, sequence, abstract, prioritize and generalize information. The student may be very concrete and stimulus-bound.

**Possible Accommodations for students with mobility impairments**

- Adjustable table or chair
- Note taker
- Extended time for testing
- Scribes for testing
- Computer use for essay tests
- Assistance with labs
- Assistance with in class writing
- Audio recording lectures

**Sensory Impairments**

**Blind or Vision Loss**
Visual disabilities can result from a variety of causes, including: congenital conditions, injury, eye disease, brain trauma, diabetes, or multiple sclerosis. A person is considered legally blind if corrected vision is no better than 20/200, or if peripheral fields are no more than 20 degrees diameters or 10 degrees radius. Eighty to ninety percent of people who are legally blind have some measurable vision or light perception. Even those students who may appear to travel and function without assistance are likely to still require some type of classroom accommodation. Most students with visual disabilities use a
combination of adaptations for class participation including: readers, notetakers, Braille, books in alternate format, voice-synthesizing computers, and optical scanning or enlarging devices. It should be noted that not all students who are totally blind can or want to read Braille. Some medical conditions may actually preclude that skill. Conditions such as diabetes for example, may reduce sensation in the finger tips as a result of poor circulation therefore limiting a person's ability to read Braille.

Instructional Strategies and Potential Accommodations

- Provide a list of textbooks, assigned reading, and tests dates as far in advance as possible. Students may need to make arrangements to have books converted to an alternate format, which could take several weeks or months.
- Read aloud or have another student quietly read any written material presented in class to the student with a visual impairment. This includes materials on the blackboard, overhead, flip-chart, Power Point, etc.
- Use good contrast in printed material for students who are partially sighted. Write larger and darker when using the chalkboard.
- Create an environment as noise-free as possible. Unnecessary sounds can be distracting. For example, turn off the overhead projector when not in use.
- When using teaching aides, such as videos, models, or slides, have someone available to assist the student with a visual disability by describing the material. If possible, make the material available for a private showing.
- Try to speak directly facing the class; turning your head away can muffle or distort the sound of your voice.
- Since the student with a visual disability cannot see visual cues, it is important for him/her to be seated in a position to receive verbal cues.
- Dog guides are trained and well-behaved. Do not worry that they will disrupt your class. They will require no special consideration with the possible exception of planning a field trip.
- Encourage students to meet with you at the beginning of the term to discuss any potential accommodations. Consider an alternative form of an assignment if the original format creates an excessive burden for a student with a visual disability. It is important to remember that any alternative version should require the same level of skill and effort as the original assignment.
- Invite students to discuss timelines for projects and assignments with you. Information gathering and assistance from readers, notetakers, or volunteers may require additional time.
- Be prepared to give the student additional lead time to complete assignments.
- The majority of students with visual impairments will use recorders, laptops, or other technology for note taking. If not, a notetaker may be necessary.

Communication Suggestions

- Introduce yourself and anyone else present when speaking to a student with a visual disability.
- Do not feel uncomfortable using words such as "see" or "look," as students with visual impairments use these terms also.
- When walking with a student who has a visual disability, allow him/her to take your arm just above the elbow. Walk with a natural manner and pace.
- Ensure that when giving directions to a person with a visual disability you are clear and accurate. Use north, south, east, and west as well as left and right.
- When guiding a person with a visual disability, slow down when approaching steps or obstacles and let them know what is in their path. Let the student know if you will be going up or down the stairs. When coming to a door, tell them if it opens in or out.
- When offering a seat to a student with a visual disability, place the student's hand on the back or arm of the chair. This gives the student a frame of reference to seat him/herself.
- Let a student with a visual impairment know when you are leaving a room.
• A guide dog is trained as a working animal and should not be petted or spoken to without the permission of the handler. A general rule of thumb is that the dog is working while in a harness.
• In case of emergencies, alert the student to the nature of the situation. Offer assistance to the student and guide him or her to the nearest emergency exit and away from the building to safety. Some types of emergencies require safety within a building. Depending upon the nature of the emergency, during crisis periods, there may be a lot of commotion and noise. A student who is blind may not be able to orient himself or herself as well as in calmer times. Your assistance is critical to their safety.

Possible Accommodations for students who are blind or have a vision loss
• Front of classroom seating
• Note taker
• Extended time on testing
• Alternative format textbooks
• Enlarged copies of tests, notes, handouts
• Assistance with labs
• Assistance with in class writing
• Audio recording lectures

Deaf or Hard-of-Hearing
Students who are deaf or hard-of-hearing do not all have the same characteristics. Individuals who are deaf rely upon visual input rather than auditory input when communicating. Some hard-of-hearing individuals have a measure of usable residual hearing and use a device to amplify sounds (Assistive Listening Device). Some choose to speak; others use very little or no oral communication. Some students are extremely adept at speech reading, while others have very limited ability to “read lips.” For some, sign language and/or fingerspelling are the preferred means of communication.

Possible Accommodations for students who are deaf or hard-of-hearing
• Sign language interpreter
• Closed captioning
• Front of classroom seating
• Note taker
• Assistive Listening Device (ALD)
• Transcriptionist or Captionist

If a student with a mobility or sensory impairment uses a service animal, they need to register with the OSD. The faculty will be notified that the service animal is an approved accommodation.

CONSIDERATIONS FOR TEACHING ALL STUDENTS WITH DISABILITIES

Universal Design for Learning
“Universal design is an approach to designing course instruction, materials, and content to benefit people of all learning styles without adaptation or retrofitting.” (Visit www.osu.edu/grants/dpg/fastfact/undesign for more information.) By incorporating Universal Design principles in instruction that allow students with disabilities access to the classroom, you may also be designing instruction that works better for everyone in the class. Classes designed with this concept in
mind offer a variety of methods of content presentation, flexible teaching strategies, and options for demonstrating mastery of course content.

**Comprehensive Syllabus**
A comprehensive syllabus with clearly delineated statements about expectations is helpful to students who need help with structure and organization. Students with early access to the course syllabus can order alternative format textbooks if necessary and balance their course load accordingly. Some need additional time to get started on the material for the course.

Items to Include on your Syllabus:
- State course goals and objectives
- Specify exam and assignment dates
- State office hours and encourage students to use them
- Detail assignments and papers for easy reference
- Detail grading and evaluation methods
- List course policies
- Provide as much information about lecture topics as possible
- Provide the ADA statement to encourage students with a documented disability to meet with an OSD staff member.

**Syllabus Statement**
Normandale Community College is committed to providing equal access for students with disabilities through the Office for Students with Disabilities (OSD). If you experience educational barriers because of a disability, please make an appointment for an intake/interview to discuss these needs and to implement appropriate accommodations for your Normandale courses. Appointments are available by calling the OSD staff at 952-358-8625, emailing osd@normandale.edu, or stopping by the L2751 office.

*This syllabus is available in alternate formats upon request.*

**Lectures**
Since students have various learning styles, faculty could use a combination of delivery methods to enhance student learning and success for all students.

The following are some suggestions for presenting lecture material:
- Provide an outline with key concepts or vocabulary prior to lecture
- Write key terms and technical vocabulary on the board
- Link previous lecture to current lecture
- State class session objective
- Give more than adequate time for students to copy information from visual display or, better yet, provide a handout
- Make notes available on Desire2Learn
- Encourage students to read the text prior to the lecture discussion
- Summarize or draw conclusions at the end of the lecture
- Keep oral instructions concise and reinforce with cue words
- Repeat or reword complicated directions or provide a detailed handout of the directions
- Use everyday life analogies and examples to make abstract information easier to understand
- Leave time for questions
Guided Notes
Guided notes are instructor-prepared handouts that provide all students with background information and standard cues with specific spaces to write key facts, concepts, and/or relationships during a lecture. Students with complete and accurate notes that study them consistently receive higher test scores than students who only listen to a lecture and read the text.

Providing Accessible PDFs
Optical Character Recognition (OCR)

*Please OCR all PDF documents before posting them electronically.*

OCR provides accessibility for people using various screen navigation systems and screen reading programs. We encourage all materials at Normandale be accessible by processing all documents through the process (syllabi, assignments, readings, postings, etc.) prior to posting them on the electronic course delivery system (D2L, et. al).

- How to OCR documents:
  1. Use only “clean” originals to scan
  2. Open the document in Adobe Acrobat Pro
  3. Select **Tools** in upper right hand corner
  4. Select **Text Recognition**
  5. Select **In This File**
  6. Select **All Pages**
  7. Click **OK**
  8. When it is done, click **File**
  9. Click **Save As** and make sure it is saved as a PDF
  10. You can select the location and re-name the document
  11. Please post this OCR version of the PDF to your online content

**Tip:** When using Adobe Acrobat Pro, if a document is not already OCR converted, trying to highlight the document will result in the program automatically asking if you would like to convert the document to be OCR compatible.

- Accessing Adobe Acrobat Pro

Adobe Acrobat Pro is available to use on all faculty and staff computers. Follow the below steps to install Adobe Acrobat Pro if it is not preinstalled on your computer.

  1. Type in **Software Center** in the start menu search box and click on the program link
  2. Click on **Adobe Acrobat Professional**
  3. Click on **Install** and follow the prompts

Student Expectations
Although many students with disabilities need accommodations, expect these students to perform at the same level as the rest of the class. Do not have a special grading scale or other criteria for them.

Inappropriate Behavior
Students with disabilities are subject to the code of conduct required of any student at Normandale Community College.

OSD FORMS

Explanation of OSD Forms

Form 1. **Accommodation Eligibility form.** This form is given each semester to every instructor who has a student in their class that is registered with the OSD. The form states accommodations for which the student is eligible.

Forms 2 & 3. **Testing Accommodation forms.** Alternative testing may include extended time, testing in a quiet room, audio recorded (taped) tests, enlarged print, use of a computer, or use of a scribe. An eligible student will bring the instructor the confidential “Testing Accommodation Letter” to request alternative testing. This form will state what particular testing accommodation(s) the student receives. The student will also bring the instructor a purple alternative testing form. The instructor should complete this form and personally return it with the test to L2751, the OSD office.

Form 4. **Student Release.** If a student requests the presence of a parent or other person at the intake interview to register for OSD accommodations, the student is required to sign a release. A release is also required if the student wishes information to be shared with others at a later date.

Form 5. **Emergency Evacuation Plan.** This form is sent to instructors who have students with mobility or vision disabilities. The OSD staff also reviews the evacuation information with the student each semester. A list of students with mobility and/or vision disabilities is sent to the Security department each semester.

Form 6. **Questions and Answers about Interpreting.** This form is sent to all faculty who have a student who is deaf and requires the services of a sign language interpreter.
Debbie Tillman, Director of the Office for Students with Disabilities ~ Office L2755~(952)358-8623 ~ Debbie.Tillman@normandale.edu

Your involvement is necessary in order to provide accommodations to this student; please contact me if you have any questions or concerns. This is a confidential document and should be destroyed at the end of the semester. Do not forward or share this document. Thank you for your support!

### Student Accommodations

**Instructor:** Name  
**Fall 2016**

<table>
<thead>

| GEOG 1170 20   | Student #4 | Testing Extra test time: 1 1/2 times  
Classroom Student note taker or lecture notes | |

**Note About Testing Accommodations:** Students must bring the blue testing accommodations form to you prior to the test in order to receive accommodations. Tests may be delivered to the OSD staff in L2751 or after hours to the Testing Center locked box. **Please use a purple testing form for OSD students.**

Security should be called immediately at 555 or 952-358-8280 if a medical or other emergency should occur during your class.
Testing Accommodation Letter
Office for Students with Disabilities (OSD)

-- CONFIDENTIAL --

John Smith

BIOL 1104 22

05/18/2016

Jane Doe

To Instructor:

I qualify for testing accommodations through the OSD. By presenting you with this form, I am confirming access to the following testing accommodation(s) in your course:

- Extra test time
- Quiet setting

1 ½ times

This request is for all exams, quizzes and/or lab practicals this semester unless the statement below is checked.

☐ If this box is checked, these testing accommodations are being authorized for ONE upcoming exam ONLY. The student is in the process of registering to receive services from the OSD.

Instructors: Please put tests in a "Make-up Testing" envelope with the completed purple testing sheet attached and bring to the OSD office in L2751 or leave in the drop box in the Make-up Testing room (L2740). If you have any questions, please contact the OSD staff at 952/358-8625 or email osd@normandale.edu.

Mailbox: ☐ A 2505 ☐ P 2822 ☐ F 1262 ☐ F 2205 ☐ C 3111 ☐ L 1763 ☐ S 2356

OSD TESTING PROCEDURES

☐ A testing letter printed and picked up from the OSD should be given to the instructor by the OSD student before tests may be taken in the OSD area and should be kept in the instructor's records for the duration of the semester.

☐ It is the responsibility of the OSD student to deliver a purple form to the instructor 3-4 days before each test. If a student forgets, the intent of this procedure is not to penalize them by refusing the accommodation but to teach the student to take responsibility for the accommodation and personal educational needs. Every effort should be made by OSD staff and faculty to help the student.

☐ Implementation of “tests taped” accommodation:

☐ OSD Student: If you are eligible and need tests provided in an audio format, you need to check the “test taped” box.

☐ Faculty: The OSD staff need tests delivered to the OSD area 2 days prior to the test in order to have sufficient time to audio record the test for the OSD student.

☐ Faculty: Please fill in the date and time the student must take the exam in the designated section of this form. The date and time stated will be the only time the student is allowed to take the test unless you indicate otherwise in the flexible date range fields.

OSD note: The accommodation is for extra time, not an extension of the test date.

In order for students to receive additional time, their testing session may need to begin prior to the classroom test session, but should overlap with the class testing time.

☐ Testing Hours for OSD Students: Monday-Thursday 8:00am-6:30pm

☐ Fridays 8:00am-4:00pm

☐ 7:45am start times for tests may be available by appointment.***

☐ Night students may need to take tests earlier on the test day or the day following a test (Saturday students on the day before or the following Monday), but this needs to be determined in the conversation between the instructor and the OSD student. The ultimate testing time must be appropriate and reasonable.

☐ Faculty: Please do not send tests to the OSD via interoffice mail. Instead, use a Make-up Testing envelope, attach this purple form and bring it to the OSD office (L2751) or place in the locked drop box in the Testing Center (L2740).

Authorization for the Release of Student Information

I, ________________________________ hereby authorize Normandale Community College to release
and/or orally discuss the education records described below about me to:

__________________________________________________________________________________________

The specific records covered by this release are:

☐ All
☐ Judicial File
☐ Transcripts
☐ Grades & Class Progress
☐ Student File
☐ CRP/OSD/SSS/Counseling Records
☐ Financial Aid Records
☐ Other: ________________________________________________________________________________

The persons to whom the information may be released, and their representatives, may use this information for the following purposes:

__________________________________________________________________________________________

I understand that the student records information listed above includes information which is classified as private on me under Minnesota Statute §13.32 and the Federal Family Education Rights and Privacy Act. I understand that by signing this Informed Consent Form, I am authorizing the College to release to the person(s) named above and their representative(s) information which would otherwise be private and not accessible to them. I understand that without my informed consent, the College could not release the information described above because it is classified as private.

I understand that when my education records are released to the person(s) named above and their representative(s) the College has no control over the use the person(s) named above or their representative(s) make of the records which are released.

I understand that, at my request, the College must provide me with a copy of any educational records it releases to the person(s) named above pursuant to this consent. I understand that I am not legally obligated to provide this information and that I may revoke this consent at any time. This consent expires upon completion of the above stated purpose or after one year, whichever comes first. However, if the above-stated purpose is not fulfilled after one year, I may renew this consent. A photocopy of this authorization may be used in the same manner and with the same effect as the original documents.

I am giving this consent freely and voluntarily and I understand the consequences of my giving this consent.

Example of Form 4-Privacy Form
Emergency Evacuation/Severe Weather Plan
for Students with Disabilities

In the event an emergency alarm is sounded in any of the buildings on the Normandale Community College campus, it is extremely important that each person understands where to go and what to do in order to ensure a safe and timely evacuation from the premises. **Do not use elevators if there is a fire or severe weather alarm.**

Faculty Members: If you have a student in your classroom who has a mobility disability or vision loss, it will be identified on their accommodation sheet from the office for Students with Disabilities that you will receive at the beginning of each semester. During a college evacuation, please notify Public Safety by calling 555 or 952-358-8280 that you have a student with a mobility disability who needs additional assistance with evacuation. Please stay on the floor you are on and wait for an emergency responder to assist the student. Designated rescue areas for fire are located at any elevator. If a student with vision loss expresses that they would like assistance navigating the stairwells, please assist them. Otherwise, stay with the student until help arrives.

Students: During an evacuation, students with a mobility disability should stay with their classroom instructor who will call Public Safety either by pressing the emergency button in a classroom, calling 555 or 952-358-8280 to notify them that additional assistance is needed if you are unable to access an evacuation exit. If you have a vision loss, it is recommended that you seek assistance using stairwells, as they will be congested. If you are in immediate danger, move to a safe place, which would include the designated rescue areas near elevators, designated rooms, or corridors. If you are not in class during an evacuation, either seek assistance if needed, leave the building if appropriate, or call 952-358-8280 for evacuation assistance. Remember that the college is a safe place and is protected by a sprinkler system. For your protection, we recommend that you carry a cell phone at all times.

Evacuation Exits:
- All areas of the ground floor of Partnership and the Student Center and the first floors of all other buildings have outdoor access.
- All areas on the second floor of the inner ring corridors have access to the outdoor courtyard area.

Designated Rescue Areas: If you cannot safely exit it is recommended that you wait near an elevator and call for assistance. Here is a list of room numbers near those elevators on floors without evacuation exits:
- **Science:** S2384 (if it’s not safe to exit to the courtyard)
- **Library:** L2700 (if it’s not safe to exit to the courtyard), L3700 (3rd floor)
- **College Services:** C2100 (if it’s not safe to exit to the courtyard), or C3045 (3rd floor)
- **Fine Arts:** F2274
- **Activities:** A2579 (if it’s not safe to exit to the courtyard)
- **Partnership:** P1808 (1st floor), or P2816 (2nd floor)
- **Student Center:** go to Science Building - emergency exit near S1342 or elevator on 1st floor near room S1376 if path is blocked to the exit.

Severe Weather: If you are NOT located on the ground level of a building, the above rescue areas are also used for severe weather unless they are near windows. Please seek out the following exceptions in the event of severe weather:
- Partnership Center: classrooms P1838, P1808, P2842, or P2802
- Library: hallway near L2756-L2760
- Activities: hallway between A2554 and A2556
- Kopp Student Center: go to Activities Building hallway

**Emergency personnel will evacuate OSD students from rescue areas after the instructor calls Public Safety at 555 or 952-358-8280.**

In addition, designated safe areas for evacuation will have directions and maps with identified areas, analog phones, and space for at least two wheelchairs. The emergency response team will provide evacuation lift chairs.
Evacuation Map
Questions & Answers about Interpreting

Who is that person sitting in the front of the room?

Interpreters are professional staff members or contractors who act as interpreters for students who are deaf or hard-of-hearing. They follow a code of ethics that can be found at www.RID.org.

You may feel like you need to introduce or explain their presence to the class, but this is unnecessary and draws attention to the deaf student that may not be desired. The fact that they are there to interpret becomes very quickly apparent to the class. Other students in your class will pay less attention to the interpreter as time goes on and as they become accustomed to having the interpreter in the room.

What can I do?

Speak at your normal speaking rate. Conduct class as you usually do. If there is a problem, the interpreter or the student will let you know.

Use videos and films that are closed captioned. Even if you are showing a video or movie with closed captioning, leave some light on the interpreter. Even with captioning, the student may ask the interpreter for clarification of terms or may desire to have the content interpreted instead. Lighting is very important; the student needs to see the signs and facial expressions of the interpreter. If needed, a small spot light can be borrowed from the OSD (Office for Students with Disabilities) staff in L2751.

When speaking to the student who is deaf or hard-of-hearing, speak directly to the student. Avoid phrases like: “Tell him…” or “Ask her…”

For your information…

The interpreter will interpret everything that is said. Also, when the student is signing, the interpreter will voice what is being signed unless they are working out clarification of sign choices. The interpreter is speaking for the student who is deaf or hard-of-hearing. It is not the interpreter’s comments or questions. Please also do not direct questions or comments to the interpreter. Unless the interpreter is asking you for clarification so they can interpret better, it is best that you pretend they are not there.

The goal of interpreters is to facilitate communication. The contracted interpreters do not counsel or teach. Contracted interpreters cannot discuss the student’s progress or behavior. Any questions regarding the student’s programming can be directed to the OSD staff (including the staff interpreter, Geri Wilson).

For Further Information Contact the Office for Students with Disabilities (OSD) in L2751
