- quality

Six Sigma Green Belt Certificate for Healthcare

The Six Sigma Green Belt Certificate for Healthcare is for anyone seeking medical field employment. You will gain a solid understanding of processes and quality methodologies while containing costs. Development of innovative and practical solutions for problem solving in any organization is an essential asset in the job market.

Participants should have a sound knowledge of basic mathematics and be comfortable with computers, particularly MS Excel. A desire to learn and be successful with Six Sigma is more important than analytical abilities. Participants will earn a certificate and be prepared to work on Six Sigma teams supporting Black Belts on projects.

Schedule: May 3, 4, 10, 11, 17, 18, 24, 25
8:30 am to 5:00 pm

Course Fee: \$3,355 – **Discounted WIA Course Fee: \$2,850**
Course reference and text books are included

Location: Normandale Community College

Registration: www.normandale.edu/continuingeducation

I have questions...

**More and more
healthcare providers
are realizing
the imperative need of
improving quality
through Six Sigma
for responding to
challenges in the industry.**

My background is not in a medical setting. How will this prepare me to work in the healthcare field? *This course has specific examples and projects related to the medical setting. This will promote your success in a healthcare organization deploying Six Sigma. The instructors have taught Six Sigma in the healthcare arena and will provide excellent insight for application on the job.*

I am a healthcare professional with a main role of patient care. Will a Green Belt in Healthcare benefit me? *Yes, it will. Even M.D.'s and nursing staff have processes built into their role in caring for patients that be positively impacted with Six Sigma deployment. Being effective and efficient, the backbone of Six Sigma, is necessary for all arms of healthcare to operate optimally.*

How does a manufacturing methodology like Six Sigma benefit a service industry like healthcare? *Service industries have processes to create and deliver their service. Six Sigma can develop these processes to be both effective and efficient in bringing high quality outcomes to service industries, like healthcare.*
