COURSES

ACCT 1052 COMPUTERIZED ACCOUNTING | 2 CR

Prereq: [ACCT 1051](#) , or [ACCT 2251](#)

This course is designed for non-accounting majors. The course provides an environment in which students use computerized accounting software to create financial statements and other financial reports, reinforce learned accounting concepts, and see how computer software can be used to make business decisions.

Credits: 2 Semesters: Spring

ACCT 2251 FINANCIAL ACCOUNTING | 4 CR

This course, the first of the two consecutive courses in financial and managerial accounting, is designed to develop basic accounting knowledge of students in the following areas: generally accepted accounting principles and concepts, accounting cycle, preparation of financial statements, cash management, accounting for merchandising operations, receivables, inventory, current and long-term liabilities, long-term assets, stock transactions and financial statement analysis.

Credits: 4 Semesters: Fall, Spring

ACCT 2252 MANAGERIAL ACCOUNTING | 4 CR

Prereq: [ACCT 2251](#)

This course is the second of the two consecutive courses in financial and managerial accounting. The course focuses on managerial accounting concepts and accounting tools and techniques used for decision-making. The course content includes job and process costing, activity-based costing, cost volume-profit analysis, target pricing, budgets, variances and cost-revenue analysis for decision-making.

Credits: 4 Semesters: Fall, Spring

ACCT 2853 FEDERAL INDIVIDUAL INCOME TAX | 4 CR

Prereq: [ACCT 2251](#)

This course is intended to cover Internal Revenue Code as applied to individual income tax returns. The material covered would include filing requirements, personal tax credits and exemptions, gross income inclusions and exclusions, itemized deductions, employee business expenses, self-employment, rental activities, property basis, and capital gains and losses. Students will have the opportunity to prepare federal and state income tax returns using tax preparation software. (Same as BUSN 2853.)

Credits: 4 Semesters: Fall, Spring

CIM 1201 INFORMATION TECHNOLOGY CONCEPTS AND BUSINESS SOFTWARE 1 | 3 CR

Recommended: Keyboarding and proofreading skills. This course is taught using Microsoft Office latest version business software for a PC. Prereq: Eligible for [READ 0860](#) , and [ENGC 0900](#)

The purpose of the course is to prepare students for their future academic and professional pursuits using computers. The outcomes are designed to give students the tools to exceed the minimum expectations of employers. The course includes computer concepts and computer application software. The students will learn computer concepts of how computers operate, how they are used in industry, and how they improve communications. They will learn computer hardware, software and development, personal productivity software, data communications, the World Wide Web and e-mail, the social challenge, and career options. The students will learn computer application software using document production in word processing, spreadsheets, and database management. Students will create text-based documents to include letters, research reports in MLA and APA formatting with citations, one-page brochure with clip art, page and section breaks, reviewing/tracking features, and creating a resume as a web page; use the formula features, charting, functions, pivot tables and goal seeking for spreadsheets; and use the database features to create tables and reports, import data from Excel, set validation rules, and establish referential integrity of data including sorting and querying to gain skills to use in other courses or in the workplace. This course is required for most upper level Management Information Systems classes at 4-year colleges. (Same as BUSN 1201).
